This book reports on the findings from a research study of vocational and higher education graduates' employability challenges. The nature and extent of these challenges, their underlying causes, and effective strategies to address the problems in this area are all analysed from a multiple-stakeholder paradigm. The primary focus of the book is on governments; secondary, vocational, and higher education systems; and industry employers - rather than graduates themselves - in order to highlight the policy and strategy implications for governments, industry and educational systems. Readers will

Shows how Japan's immigration policy is shaped by the nature of Japan's economy and elite debates about the country's national identity. In *Help (Not) Wanted*, Michael Strausz offers an original and provocative answer to a question that has long

perplexed observers of Japan: Why has Japan's immigration policy remained so restrictive, especially in light of economic, demographic, and international political forces that are pushing Japan to admit more immigrants? Drawing upon insights developed during nearly two years of intensive field research in Japan, Strausz ultimately argues that Japan's immigration policy has remained restrictive for two reasons. First, Japan's labor-intensive businesses have failed to defeat anti-immigration forces within the Japanese state, particularly those in the Ministry of Justice and the Japanese Diet. Second, no influential strain of elite thought in postwar Japan exists to support the idea that significant numbers of foreign nationals have a
