One of our favorite waltzes from the region caught the ear of Peter Ilyich Tchaikovsky while on a vacation in Italy, and made its way into his orchestral composition, Capriccio Italian. Tchaikovsky ingeniously incorporated the song, "Treccie Bionde", which gave his Capriccio it's distinct, unmistakably Italian flavor.

Le bionde treccie, gli occhi azzurri e poi. Le tue calzette rosse. E l'innocenza sulle gote tue. Due arance ancor più rosse. E la cantina buia dove noi. Respiravamo piano. E le tue corse e l'eco dei tuoi no, oh no. Mi stai facendo paura. Dove sei stata, cosa hai fatto mai? Una donna, donna, dimmi. Cosa vuol dir "sono una donna, ormai"?

This book investigates the concept of phase, aiming at a structural definition of the three domains that are assumed as the syntactic loci for interface interpretation, namely vP, CP and DP. In particular, three basic issues are addressed, that represent major questions of syntactic research within the Minimalist Program in the last decade. A) How is the set of minimally necessary syntactic operations to be characterised (including questions about the exact nature of copy and merge, the status of remnant movement, the role of head movement in the grammar), B) How is the set of minimally necessary functional heads to be characterised that determine the built-up and the interpretation of syntactic objects and C) How do these syntactic operations and objects interact with principles and requirements that are thought to hold at the two interfaces. The concept of phase has also implications for the research on the functional make-up of syntactic objects, implying that functional projections not only apply in a (universally given) hierarchy but split up in various phases pertaining to the head they are related to. This volume provides major contributions to this ongoing discussion, investigating these issues in a variety of languages (Berber, Dutch, English, German, Modern Greek, Hebrew, Italian, Norwegian and West Flemish) and combining the analysis of empirical data with the theoretical insights of the last years.

One of the most important authors of the Middle Ages, Petrarch occupies a complex position: historically, he is a medieval author, but, philosophically, he heralds humanism and the Renaissance. Teachers of Petrarch's Canzoniere and his formative influence on the canon of Western European poetry face particular challenges. Petrarch's poetic style brings together the classical tradition, Christianity, an exalted sense of poetic vocation, and an obsessive love for Laura during her life and after her death in ways that can seem at once very strange and--because of his style's immense influence--very familiar to students. This volume aims to meet the varied needs of instructors, whether they teach Petrarch in Italian or in translation, in surveys or in specialized courses, by providing a

wealth of pedagogical approaches to Petrarch and his legacy. Part 1, "Materials," reviews the extensive bibliography on Petrarch and Petrarchism, covering editions and translations of the Canzoniere secondary works, and music and other audiovisual and electronic resources. Part 2, "Approaches," opens with essays on teaching the Canzoniere and continues with essays on teaching the Petrarchan tradition. Some contributors use the design and structure of the Canzoniere as entryways into the work; others approach it through discussion of Petrarch's literary influences and subject matter or through the context of medieval Christianity and culture. The essays on Petrarchism map the poet's influence on the Italian lyric tradition as well as on other national literatures, including Spanish, French, English, and Russian.

This book offers an integrated description of all aspects of word order in Old Italian, looking at the left periphery not only of the sentence, but also of the verbal phrase and determiner phrase. It makes important contributions to the study of medieval Italian, Romance historical linguistics, and diachronic syntactic change more generally.

This book assesses the pivotal role played by the concept of beauty in Italian literature and language in the construction of the Italian national identity.
