France has always been a fantasy for people around the world and is still considered symbol of Romance and the Beauty. However, there are not many people who know the real France and how the country is

largely overestimated by the world audience and French citizens. This book will provide readers with an unusual and informative overview of the country from an insider prospective. Unlike those of Wikipedia or Lonely planet this guide will not provide your typical travel information. Instead you will read about all the 'little secrets' of France that is unavailable in your everyday travel guidebooks. 'French Secrets' is written on the basis of 'Modus Tollendo Tollens' (the mode which denies by denying) that defies what is commonly known among people by exposing political, social, cultural, economic, historical, industrial unknown facts. For example, France is well known as the country of beauty but you will find that this definition is not true in this book, and readers will discover hidden facts that bring raise doubt to their previous belief and knowledge. Directly 'exposing unknown facts' is 'Knowing the truth.' A truth that is crucial to people with specific purposes such as business, trade, studying, conference, vacation, etc. For this reason, this book includes scientific studies that have been interpreted into philosophical terms. For example, the British often describe the French as 'rude, arrogant and selfish.' This insider's guide will explain why they feel this way with concerned scientific statistics. This book is, therefore, easy to read, useful, full of information, and with humorous insight. Both Global standard and Cultural relativity are represented in this book. Because each country has different social values that are generated from different historical experiences, there are still common human values that are called 'Global standards' in this book. This is because in spite of their differences in nationality and ethnics human beings share the same biological and social needs in their lives. Biological living conditions, freedom of speech, being polite to others, being socially responsible, health care, education, housing, etc. They are all equally important to every human being. Global standards are therefore defined as 'Ethical requirements' in this book. However the Cultural relativity otherwise known as 'the Locality' cannot be disregarded because this is a realistic requirement for safety and respect while visiting a different world. For example everyone in the western world agrees that women are unfairly treated in Islamic countries and other areas of the world such as India. This is because the freedom and respect of women in these countries are greatly disregarded in their society. The Islamic system may be viewed as democratic to Muslims because they are living in a different world that is ruled by 'Theocratic democracy' and it is based on their scriptures. It is unlike our 'Secular democracy or Humanistic democracy' that are based on a constitution. These kinds of disputes are also found in the western world even though we share the same Christianity based civilization. The hostility between Socialist democracy and Capitalist democracy or ethnic conflicts between the Aryan and the Slav are examples of these as well. In conclusion, the philosophical balance becomes critically important when we review a country because a creditable conclusion is deductible only when the inference is true. For example, a syllogism of 'USA is good, and Iran is the enemy state of USA, therefore Iran is the evil' is not creditable because the premise is gravely lacking objective

scientific evidence but only provides a subjective ideological belief. One thing is certain in this book, anything that is against Global standards (in other words, Ethical requirements) is defined as 'false' regardless of excuses regarding Cultural relativity.

Attention bread lovers! In the first of his famous books about Provence, Peter Mayle shared with us news of a bakery in the town of Cavailhon where the baking and appreciation of breads "had been elevated to the status of a minor religion." Its name: Chez Auzet. Now, several hundred visits later, Mayle has joined forces with Gerard Auzet, the proprietor of this most glorious of Provençal bakeries, to tell us about breadmaking at its finest. Mayle takes us into the baking room to witness the birth of a loaf. We see the master at work—slapping, rolling, squeezing, folding, and twisting dough as he sculpts it into fougasses, bâtards, and boules. Auzet then gives us precise, beautifully illustrated instructions for making sixteen kinds of bread, from the classic baguette to loaves made with such ingredients as bacon, apricots, hazelnuts, garlic, and green and black olives. There are tips galore, the tricks of the trade are revealed, and along the way Mayle relates the delightful history of four generations of Auzet bakers. One of Provence's oldest and most delicious pleasures is now available at a kitchen near you, thanks to this charming guide. Read, bake, and enjoy.

mother-in-law--Elizabeth has gathered a treasure trove of information that has radically changed her own eating habits for the better. She realized that what most Americans call "dieting"--smaller portions, no snacking, a preference for seasonal fruits and vegetables, and limited sugar--the French simply call "eating." And they do it with pleasure, gusto, and flair. With wit, sound advice, and easy-to-follow recipes, Bard lets her readers in on a range of delightful--and useful--French secrets to eating and living well, including hunger as the new foreplay, the top five essential French cooking tools and 15 minute meals popular throughout France, and the concept of benevolent dictatorship: why French kids eat veggies, and how to get yours to eat them, too. Whether you're ready for a complete kitchen transformation or simply looking for dinner party inspiration, Dinner Chez Moi is a fun, practical, and charming how-to guide that will add a dash of joie de vivre to your kitchen--and your life!

An engaging exploration of the style that permeates all things French--perfect for anyone looking to achieve that classic French flair For Harriet Welty Rochefort, an American who has lived in France for many years with her very French husband, it's clear that the French truly are singular in the way they live, act, and think--from the lightness of their pastries to the refinement of their Hermes scarves. They simply exude a certain je ne sais quoi that is a veritable art form. The French revel in the moment, appreciate the time spent in preparing a perfect feast, pay attention to the slightest detail--whether flowers on the table or a knockout accessory on a simple outfit--and work hard when not enjoying their (considerable) leisure time without an ounce of guilt. Their joie de vivre can come where you least expect it: for the French it's better to have a chagrin d'amour than no amour at all, and for the Frenchman a day without discord is a day without a kick. They have fun (yes, fun !) when they fuss and feud, squabble and shrug. When it comes to joie de vivre, Harriet is convinced the French are unbeatable. With good humor and genuine affection for the prickly, paradoxical, and pleasure-seeking Gauls, she takes the reader on her own personal journey through the often byzantine French mindset, sharing tips and tricks such as how to diet like a Frenchwoman and project confidence like a true Parisienne. In her signature warm, witty, and entertaining voice, Harriet shows how joie de vivre permeates the French way of life, precisely because it doesn't include a "pursuit of happiness." Fortunately, she discovered, you don't have to "pursue" happiness in France. It pursues you.
