Indigenous leaders and other visionaries suggest solutions to today's global crisis • Original Instructions are ancient ways of living from the heart of humanity within the heart of nature • Explores the convergence of indigenous and contemporary science and the re-indigenization of the world's peoples • Includes authoritative indigenous voices, including John Mohawk and Winona LaDuke For millennia the world's indigenous peoples have acted as guardians of the web of life for the next seven generations. They've successfully managed complex reciprocal relationships between biological and cultural diversity. Awareness of indigenous knowledge is reemerging at the eleventh hour to help avert global ecological and social collapse. Indigenous cultural wisdom shows us how to live in peace--with the earth and one another. Original Instructions evokes the rich indigenous storytelling tradition in this collection of presentations gathered from the annual Bioneers conference. It depicts how the world's native leaders and scholars are safeguarding the original instructions, reminding us about gratitude, kinship, and a reverence for community and creation. Included are more than 20 contemporary indigenous leaders--such as Chief Oren Lyons, John Mohawk, Winona LaDuke, and John Trudell. These beautiful, wise voices remind us where hope lies.

Don DeLillo, *American Original* is a startlingly original and provocative reinterpretation of one of the most important novelists of the 20th and 21st centuries. Adopting a direct approach that steers clear of debates with secondary literature and covering the full arc of Don DeLillo's career from *A* to *Z* - *Americana* (1971) to *Zero K* (2016) - Michael Naas shows that the extraordinary power, authority, insight, and inventiveness of DeLillo's fiction are the result of the way it traffics everywhere in contraband goods and narratives, in doubleness or duplicity of every kind, in multiple voices, story lines, times, places, and media that at once interrupt and complement one another. This is a book that invites skimming and dipping, structured into easily digestible sections on everything from weapons and drugs to erotica, nuclear waste, and secret societies, each preceded by humorous and incisive epigraphs from DeLillo's novels. Michael Naas reads DeLillo's fiction as a way of life or as equipment for living, rather than as a critical puzzle to be solved - and thereby opens up new horizons for thinking about why literature matters in the 21st century.

Over twenty years ago, Godine published the first English translation of Georges Perec's masterpiece, *Life A User's Manual*, hailed by the *Times Literary Supplement*, *Boston Globe*, and others as "one of the great novels of the century." We are now proud to announce a newly revised twentieth-anniversary edition of this classic. Structured around a single moment in time - 8:00 PM on June 23, 1975 - Perec's spellbinding puzzle begins in an apartment block in the XVIIth arrondissement of Paris where, chapter by chapter, room by room, the extraordinarily rich life of its inhabitants is marvelously revealed.

One of Fuller's most popular works, *Operating Manual for Spaceship Earth*, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide "spaceship earth" toward a sustainable future.
