At the crossroads of art and science, Beautiful Brain presents Nobel Laureate Santiago Ramón y Cajal's contributions to neuroscience through his groundbreaking artistic brain imagery. Santiago Ramón y Cajal (1852–1934) was the father of modern neuroscience and an exceptional artist. He devoted his life to the anatomy of the brain, the body's most complex and mysterious organ. His superhuman feats of visualization, based on fanatically precise techniques and countless hours at the microscope, resulted in some of the most remarkable illustrations in the history of science. Beautiful Brain presents a selection of his exquisite drawings of brain cells, brain regions, and neural circuits with accessible descriptive commentary. These drawings are explored from multiple perspectives: Larry W. Swanson describes Cajal's contributions to neuroscience; Lyndel King and Eric Himmel explore his artistic roots and achievement; Eric A. Newman provides commentary on the drawings; and Janet M. Dubinsky describes contemporary neuroscience imaging techniques. This book is the companion to a traveling exhibition opening at the Weisman Art Museum in Minneapolis in February 2017, marking the first time that many of these works, which are housed at the Instituto Cajal in Madrid, have been seen outside of Spain. Beautiful Brain showcases Cajal's contributions to neuroscience, explores his artistic roots and achievement, and looks at his work in relation to contemporary neuroscience imaging, appealing to general readers and professionals alike.

When one tractor in the grass runs out of gas, the backyard doesn't stay quiet for long. Soon pirates sail in to play, and the backyard races to life with airplanes, cranes, trucks, and trains. The simple rhyming text is paired with detailed illustrations depicting the young boy's imaginative games-- three ships full of pirates, four cranes building a city of sandcastles, five trucks zooming across the lawn. Readers can count along as the vehicles and machines soar, hoist, dig, and zoom in this fantastical number book. Young readers, boys particularly, will love the trucks, trains, vehicles, and machines--and pirates--that spill across each page. The humorous and imaginative play portrayed in this book perfectly balances its emphasis on counting. The award-winning I Like to Read® series focuses on guided reading levels A through G, based upon Fountas and Pinnell standards. Acclaimed author-illustrators--including winners of Caldecott, Theodor Seuss Geisel, and Coretta Scott King honors—create original, high quality illustrations that support comprehension of simple text and are fun for kids to read with parents, teachers, or on their own! For early-to-mid first grade readers, Level G books feature more complex storylines than prior levels, and a wider variety of structure and punctuation. Illustrations offer support for decoding the more challenging vocabulary words introduced.
