Learning to Teach Science in the Secondary School, now in its third edition, is an indispensable guide to the process and practice of teaching and learning science. This new edition has been fully updated in the light of changes to professional knowledge and practice – including the introduction of master level credits on PGCE courses – and revisions to the national curriculum. Written by experienced practitioners, this popular textbook comprehensively covers the opportunities and challenges of teaching science in the secondary school. It provides guidance on: the knowledge and skills you need, and understanding the science department at your school development of the science curriculum in two brand new chapters on the curriculum 11-14 and 14-19 the nature of science and how science works, biology, chemistry, physics and astronomy, earth science planning for progression, using schemes of work to support planning, and evaluating lessons language in science, practical work, using ICT, science for citizenship, Sex and Health Education and learning outside the classroom assessment for learning and external assessment and examinations. Every unit includes a clear chapter introduction, learning objectives, further reading, lists of useful resources and specially designed tasks – including those to support Masters Level work – as well as cross-referencing to essential advice in the core text Learning to Teach in the Secondary School, fifth edition. Learning to Teach Science in the Secondary School is designed to support student teachers through the transition from graduate scientist to practising science teacher, while achieving the highest level of personal and professional development.

MyMaths for Key Stage 3 is the brand new course that works with MyMaths to fully deliver the new curriculum, allowing you to finally replace your tired old Framework materials. With a truly differentiated structure so that all abilities can access the new curriculum, the course is underpinned by a 'learn it once and learn it well' philosophy that enables coherent teaching and learning. All resources are written by teachers for teachers, so you can be confident that it will work practically in the classroom. This homework book is for higher ability students moving through Grade 6-9. It supports the corresponding student book, and allows them to build on their knowledge and skills acquired earlier in the key stage. An emphasis on gradual but visible progression, combined with a focus on fluency, makes this book an essential resource in your Grade 6-9 maths delivery. A worked example for each homework ensures that students keep on track with their work. The comprehensive glossary promotes the importance of mathematical literacy, and helps to avoid confusion later on. With the unique direct link throughout to the MyMaths site, your students will be able to receive valuable and familiar support in their written homework out of class - all helping to bring maths alive for your most able students.

Suitable for KS3 English, this guide covers everything from revision notes to practice SATS questions, with worked examples and a mock SATS paper.

MyMaths for Key Stage 3 3 is the brand new course that works with MyMaths to deliver the new curriculum. This Companion is for teachers of lower ability students starting KS3. Its thorough lesson plans, along with Lesson-at-a-Glance and links to MyMaths, is written by teachers for teachers, so you can be sure it will work in the classroom.

This Framework Edition Teacher Support Pack offers comprehensive support and guidance, providing the best possible learning experience for your students and saving time for everyone in the department.
