Accounting Principles: Managerial Accounting, is the final volume (chapters 19 - 26) of the original textbook by Hermanson, Edwards, Maher, and Ivancevich. This comprehensive college-level publication covers all managerial accounting topics and contains extensive and detailed examples, self-tests, questions, problems, alternate problems, and answers.

Now with Online Tests! See Textbook Equity Tests Online <http://textbookequity.org/textbookequitytestsonline/> Accounting principles courses teach you the "language of business" so you understand terms and concepts used in business decisions. If you understand how accounting information is prepared, you will be in an even stronger position when faced with a management decision based on accounting information. This open textbook features the authors' original content including exercises, key terms, and various forms of self-testing. Recently open licensed and updated, this Textbook Equity edition contains the complete and original content of the eighth edition of "Accounting Principles Vol 1: Financial Accounting", by Edwards, Hermanson, & Maher, successfully used by professors for over 15 years. It includes ample examples demonstrating the concepts, key terms, self-tests with exercises, problem multiple choice, true false, alternate problems, critical thinking exercises, and answers. Topics range from "academic accountants" to "ethics" to "worksheets." This is another open licensed college textbook published by Textbook Equity. <http://textbookequity.org/> Download the pdf for this and other open textbooks for no charge at [opencollegetextbooks.org](http://opencollegetextbooks.org). Support truly open licensed textbooks.

Crosson/Needles, MANAGERIAL ACCOUNTING, 10e, International Edition continuously evolves to meet the needs of today's learner. This edition's new structure is based on research about how to deliver content to students and how to mirror the way instructors have told us they teach! The authors have organized this edition into a NEW! Three Section Approach:The CONCEPTS section focuses on the overarching accounting concepts that require consistent reiteration throughout the course.The ACCOUNTING APPLICATIONS section helps students apply the accounting procedures with features like "Apply It!" and a new transaction analysis model.The BUSINESS APPLICATIONS section illustrates how concepts and procedures are used to make real business decisions.As students walk through the new Three Section Approach, they can gain extra practice with new corresponding TriLevel Problems within CengageNOW. These problems mirror the Three Sections in each chapter. Concepts, Accounting Applications, and Business Applications foster a complete understanding of each section.These substantial changes will make students more efficient learnersand prepare them to face a business world increasingly complicated by ethical issues, globalization, and technology.

Over the years there has been an accumulation of extensive research in management accounting. The traditional management accounting role of cost determination and financial control has been challenged and shifted to a more 'sophisticated' role of creating value through the development of 'new' management accounting techniques and practices. This book thoroughly reviews emerging issues of management accounting research. Each issue is reviewed by experts to explain the core concept, development, current criticisms and controversies and concludes by identifying future avenues for further research. Issues covered include the transformation of the management accounting function, strategic management accounting, environmental management accounting, balanced scorecard, performance management in non-profit organizations, inter-organizational performance measurement practices between supply chain partners, beyond budgeting, activity-based approach, target costing and throughput accounting.
