Using big data analytics, this research covers top Chinese home appliance brands, including LCD TV, refrigerator, washing machine and air conditioner, with following analysis dimensions: brand ranking by the number of items available on online stores, ranking by sales, number of times online users mention about a particular brand, brand preferences, factors affecting purchase, as well as online shoppers' comments and user analysis. All those dimensions help build a massive social media database which can more accurately reflect consumer needs in China.

Provides the fundamentals, technologies, and best practices in designing, constructing and managing mission critical, energy efficient data centers Organizations in need of high-speed connectivity and nonstop systems operations depend upon data centers for a range of deployment solutions. A data center is a facility used to house computer systems and associated components, such as telecommunications and storage systems. It generally includes multiple power sources, redundant data communications connections, environmental controls (e.g., air conditioning, fire suppression) and security devices. With contributions from an international list of experts, The Data Center Handbook instructs readers to: Prepare strategic plan that includes location plan, site selection, roadmap and capacity planning Design and build "green" data centers, with mission critical and energy-efficient infrastructure Apply best practices to reduce energy consumption and carbon emissions Apply IT technologies such as cloud and virtualization Manage data centers in order to sustain operations with minimum costs Prepare and practice disaster recovery and business continuity plan The book imparts essential knowledge needed to implement data center design and construction, apply IT technologies, and continually improve data center operations.

This book will be of great interest to those doing business in the Pearl River Delta, and China more broadly. It is also of relevance to readers

in China studies, development studies, economic development, geography, politics, sociology, environmental management, and regional development.

The chapters of this book are a selection of papers presented at a joint conference on Law, Ethics and Finance was held at the York University Schulich School of Business, 16-18 September, 2010. This book highlights with empirical data the strong interplay on ethics in organisational efficiency and entrepreneurial activity, and the role of legal settings and governance in facilitating ethical standards. It is hoped these papers encourage future scholars to continue to investigate the role of law and corporate governance in mitigating corruption and facilitating integrity in management, entrepreneurship and finance. Previously published in the Journal of Business Ethics, Volume 95 Supplement 2, 2010

Analyzes China's economic rise and its impact on global affairs, assessing China's weaknesses--environmental pollution, crisis in social trust, and faltering government institutions--in terms of their effects on the world.

This book presents a study for the determination of environmental load factors for Jacket Platforms in Malaysia and a methodology to determine the life extension of aging platforms. The simplified methods described here could be used for determining not only structural reliability but also safety factors. Its content is particularly interesting to design and maintenance engineers who are working in offshore or onshore industry.
