This dictionary describes Tocharian A, one of two Tocharian languages documented in manuscripts of Buddhist texts from the second half of the 1st millennium CE, excavated in the oases of the Tarim basin. The dictionary contains also a thesaurus, based on all the identified texts in Tocharian A, including previously published and unpublished texts from various collections (Paris, Berlin). All forms of words, including variants occurring in the texts, are listed separately with reference to all occurrences and a sample of passages in transcription and translation. The meaning of a number of words has been better defined and, when necessary, corrected against previous glossaries. Much focus has been laid on phraseology and literary parallels with other Buddhist texts in Sanskrit and Uighur. The description of the verbal forms has been listed according to the stems of the paradigms. The sources of loanwords, e.g., from Tocharian B, Old and Middle Indo-Aryan, Iranian, Old Turkic, and Chinese, as well as the corresponding words in Tocharian B, are also given.

This two-volume collection (1887) of early medieval texts, in Latin and Irish, illuminates the development of the cult of St Patrick.

Throughout his distinguished career, Patrick Moore has, without a doubt, done more to raise the profile of astronomy among the British public than any other figure in the scientific world. As the presenter of *The Sky at Night* on BBC television for nearly 50 years he was honored with an OBE in 1968 and a CBE in 1988. In 2001 he was knighted 'for services to the popularisation of science and to broadcasting'. The BBC first aired *The Sky at Night* in April 1957 and it is now in the record books as the world's longest running TV series with the same presenter. He is also the author of over 60 books on astronomy, all of which, including his autobiography have been written on his 1908 typewriter. Partly thanks to his larger-than-life personality, Sir Patrick's own fame extends far beyond astronomical circles. A self-taught musician and talented composer, he has displayed his xylophone-playing skills at the Royal Variety Performance and as a passionate supporter of cricket, he has played for the Lord's Taverners charity cricket team.

Published through the Recovering Languages and Literacies of the Americas initiative, supported by the Andrew W. Mellon Foundation. This is the first descriptive grammar of Kotiria (Wanano), a member of the Tukanoan language family spoken in the Vaupes River basin of Colombia and Brazil in the northwest Amazon rain forest. The Kotirias have lived in this remote region for more than seven hundred years and participate in the complex Vaupes social system characterized by longstanding linguistic and cultural interaction. The Kotirias remained relatively isolated from the dominant societies until the early part of the twentieth century, when the region began to experience increasing outside influence leading to processes of rapid social and linguistic change. Today the Kotirias number only about sixteen hundred people and their language, though still used in traditional communities, is rapidly becoming endangered. Kristine Stenzel draws on eight years of intensive work with the Kotirias to promote, record, and revitalize their language. Working with dozens of native speakers and drawing on numerous oral narratives and written texts, this book is the first comprehensive study of this endangered language and one of the few reference grammars of this language family.
