Textbooks play a key role in enhancing the quality of learning, especially in the context of low-income Sub-Saharan African (SSA) countries characterized by large class-size, poorly motivated and inadequately trained teachers, and short effective school years. There are also high rates of illiteracy among parents and few reading materials at home for the student to bank on. Despite extensive

investments by governments, the World Bank and other development partners, the majority of students in primary and secondary schools in SSA still lack the benefit of access to textbooks and the key reason for this shortage is affordability: textbooks are generally much more costly in SSA than in other developing regions. The need to increase access to key learning resources is of particular urgency because most African countries experience low learning outcomes which in part contributes to a high drop-out rate. Only two-thirds of those who enter school reach the final grade and only about half of these master basic numeracy and literacy skills. And although quality improvement depends on many factors inside and outside the school, there is wide agreement that

2014 availability of textbooks is both an indispensable and a cost-effective way of improving the quality of the learning process. A recent World Bank study examined the actual costs of textbooks, the scope for cost reduction, the portion of a national budget countries allocate to teaching and learning materials (TLMs) and hurdles in the way of making textbooks available to student. Some interesting findings from the study - - The availability of affordable textbooks to all students could be dramatically improved by devoting an estimated 3 to 4 percent of the primary education budget and 6 to 7 percent of the secondary education budget - The production process [] methods, copyright, length of print runs, effective procurement practices [] rather than the production costs should be the

target of cost saving strategies - The increased integration of ICTs into education in SSA can provide important opportunities for promoting availability of electronic TLMs but electronic TLMs are not a substitute for printed TLMs including textbooks

Introduction to African Stories by Moonlight. The most memorable evenings I had as a child were those in which, together with other children, I listened to adults tell us stories which were often accompanied with rhythmic and delightful songs. When I started raising my own family in the city, my children looked forward to those nights when we would regale them with those stories and songs. I noticed then that many urban children were not exposed to these stories, as they were no longer in the environment in which

2014 they were told. It was after I did some studies on Indigenous African Education as a Visiting Scholar in the African Studies Center at UCLA, that I realized the molding influence of these stories on our character. Storytelling, of course, was a basic ingredient for traditional African education. I have therefore decided to share some of these stories with those children of African descent who are now away from the environment where they are told. Children and adults of other cultures will enjoy these stories, and learn from the wisdom embedded in them. The enthusiastic reception given to them by the multicultural classes to which I read them in the Long Beach Unified School District in California, further encouraged me to seek to publish them. I have written ten short stories in a language suitable for

school readers, and a wider audience. If these stories help to revive storytelling in homes and communities, one objective for writing this book shall have been achieved. For the benefit of teachers who want to use the book to teach English, social studies, or multicultural studies, and for the benefit of families who would like to use the book for entertainment and learning, comprehension questions and answers have been prepared on each of the stories. 2014 science education. Each account is self-contained and offers a scholarly and research-informed introduction to a particular topic, theme, or perspective, with both citations to key literature and recommendations for more advanced reading. Science Education: An International Course Companion allows readers (such as those preparing for school science teaching, or seeking more advanced specialist qualifications) to obtain a broad familiarity with key issues across the field as well as guiding wider reading about particular topics of interest. The book therefore acts as a reader to support learning across courses in science education internationally. The broad coverage of topics is such that that the book will support students following a diverse range of courses and qualifications.

Educational Assessment in a Time of Reform provides background information on large-scale examination systems more generally and the South African examination specifically. It traces the reforms in the education system of South Africa since 1994 and provides a description of the advances in modern test theory that could be considered for future standard setting endeavours. At the heart of the book is the debate on whether the current standard of education in Africa is good enough . If not, then how can it be improved? The aim of this book is to

provide a point of departure for discussions on standard-setting, quality assurance, equating of examinations and assessment approaches. From this point of departure recommendations for practices in general and the exit-level (Grade 12) examination results in particular can be made. This book is ideal reading for principals, teachers, academics and researchers in the fields of educational assessment, measurement, and evaluation.
