"The Pier 70 historic district tells the story of the American steel hull shipbuilding industry from the late nineteenth century through World War II. As California's pioneering iron works, the Union Iron Works' early history coincides with the shift from wood to iron shipbuilding. By being the first steel shipyard on the West Coast in 1884, the Union Iron Works established a national steel hull shipbuilding industry. Over the next three decades, the shipyard at the Pier 70 historic district played an integral role in the United States government's efforts to increase naval resources and bolster the nation's image as an international military power. By World War I, the yard stood at the center of the shipbuilding industry."--
