Read Book Robert Anthony

and prominent psychologist Dr. Robert Anthony offers the secrets to breaking into this lucrative field--and guides readers to a career that can bring them national acclaim and astounding wealth!

Living Your Magic lays out how life, when people really look at it, is like a magic trick. A magic trick works because of illusion and misdirection. And with all sorts of tricks of the mind, human thinking and perception works just like a magic trick. When people don't understand how the trick is done, they get fooled every time! In Living Your Magic, Dr. Robert Anthony teaches readers how to look at their life before the trick or the illusions happens—and how to never be fooled again. Rather than following the same flawed premise behind almost every self-help, therapeutic, or personal development methodology that projects people having a separate "self" that needs fixing, Living Your Magic sees that "self" as an illusion. The problem is that most people don't recognize it as an illusion and believe they must change or improve their "self" before they can be happy and live a magical life. Dr. Anthony reveals that everyone has an Inner Creative Genius that allows them to live a magical life—if people would only learn to trust it and get out of their own way. In that way, life becomes easier by giving people less to think about, less to remember, and less to do, so they can truly enjoy their mind and enjoy their life!

Management Control Systems 10/e builds on strengths from prior editions by offering a rich diversity of cases balanced with current material. The primary market for Management Control Systems is an MBA level elective in control systems. The text may also be appropriate for

Read Book Robert Anthony

advanced managerial accounting courses and/or MBA-level cost accounting courses with an emphasis on management control. The text is organized to develop insights and analytical skills related to how managers go about designing, implementing, and using planning and control systems to implement strategies.
