In 2019, America is bordering on financial collapse after engaging in a third conflict in Iraq. On the home front, the president has provided funding for stem cell research, but medical success is overshadowed after corporate greed intervenes. The intention to benefit those with the greatest need quickly disappears as the replication process is used to clone all major organs. With the advent of cloning, the inevitable occurs when America's population reaches the saturation point. A

chip is now implanted into all citizens, which signals when someone reaches the mandatory age of death. Years left on a chip are for sale, and the hunt for new chips is on. Meanwhile, overseas, the war rages, where people die irrespective of age. Lieutenant Roger DeMarco must put an end to the murder of entire innocent Iraqi villages by those who would harvest the enemy and civilians alike. Doctors are caught on opposing sides of science, and even a reality TV star becomes of national interest when he sells his chip and plans to slowly kill himself in a parade of hedonism. Progress, profit, and morality collide with stunning ferocity as America must evolve or die.

economic targets. The book elaborates on innovative approaches to manage the economic, ecological and social performance in supply networks from different perspectives. In addition, it links sustainability to operational processes and illustrates specific application contexts. Moreover, it covers the social dimension of sustainability. The rise of sustainability in management forces enterprises to revisit the concept of profitability that drives their operations. Social standards and ecological targets represent critical factors that challenge industry networks. The interplay of these goals requires new insights from scientific research and managerial practice. New approaches and systems are needed to minimize environmental and social harms and to promote sustainability.

Essentials of Business Research: A Guide to Doing Your Research Project is a concise, student-friendly text that cuts through the jargon of research methods terminology to present a clear guide to the basics of methodology in a business and management context. This extremely accessible book is informed throughout by the use of clear case studies and examples that serve to bring the research process to life for student readers. Unusually for a Methods text, Wilson also explicitly considers the importance of the supervisor in the dissertation process, and explains for the reader what lecturers are looking for from their students at every stage of the process in a good research project. This book aims to guide the student through the entire research process by using actual student case examples and explaining the role of the supervisor and how to meet their expectations. Key features include: - 'You're the Supervisor' sections – helps students to meet their learning outcomes; - 'Common questions and answers' – provides students with an invaluable point of reference for some of the challenges they are likely to face while undertaking their research project; - Comprehensive section on ethical issues students need to consider when undertaking their research project; - A full student glossary. - The book is packed throughout with student-friendly features such as helpful diagrams, student case studies, chapter objectives, annotated further reading sections and summary and references at the end of each chapter. Essentials of Business Research is accompanied by a companion website containing an array of material for lecturers and students including: multiple choice questions to enable students to test their knowledge and progress; chapter-by-chapter links to academic journal articles demonstrating each method's application; chapter-by-chapter links to youtube resources to provide further context; chapter-by-chapter powerpoint slides to help lecturers and students.
