HOW TO BE HAPPIER AND MORE SUCCESSFUL BY SIMPLE CHANGES IN MENTAL ATTITUDE This is the sixth book Vash Young has written to share with others the philosophy responsible for the success and happiness he has enjoyed. His other books were bestsellers, and FORTUNES FOR ALL is undoubtedly his most important work. First published in 1959, it written during Vash Young's active retirement at the age of 70, when he was able to look back over his amazing life and career and speak with the voice of one who conquered the obstacles of fear, inhibition, and failure to become the successful salesman of \$80 million worth of life insurance and lead a full, rich life by applying his philosophy for happiness. "I know I have a good key to happiness because I have used it personally with almost unbelievable results." "This state of mind has not grown old and useless. It is more potent within me today than back in the depression years when I was changing the thinking of thousands of distressed individuals." "...we can see the human body, which has a chemical value of approximately 97 cents. But we do not see the thinking which motivates a human body. This thinking may be worth \$500,000." "All of the scientific advances being made are of very little use to the individual and his personal problems....Self-help is what he needs most of all, and that is what I am trying to supply in this book." FORTUNES FOR ALL seeks to bring together the background, philosophy and methods that had secured Vash Young's fortune as a handbook for generations to follow.

Charles Bernstein has described conceptual "poetry pregnant with thought." Against Expression, the premier anthology of conceptual writing, presents work that is by turns thoughtful, funny, provocative, and disturbing. Editors Craig Dworkin and Kenneth Goldsmith chart the trajectory of the conceptual aesthetic from early precursors such s Samuel Beckett and Marcel Duchamp through major avant-garde groups of the past century, including Dada, Oulipo, Fluxus, and language poetry, to name just a few. The works of more than a hundred writers from Aasprong to Zykov demonstrate a remarkable variety of new ways of thinking about the nature of texts, information, and art, using found, appropriated, and randomly generated texts to explore the possibilities of non-expressive language.

If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Learn how to build a database, manage your content, and interact with users. With step-by-step tutorials, this completely revised edition gets you started with expanded coverage of the basics and takes you deeper into the world of server-side programming. The important stuff you need to know: Get up to speed quickly. Learn how to install PHP and MySQL, and get them running on both your computer and a remote server. Gain new techniques. Take advantage of the all-new chapter on integrating PHP with HTML web pages. Manage your content. Use the file system to access user data, including images and other binary files. Make it dynamic. Create pages that change with each new viewing. Build a good database. Use MySQL to store user information and other data. Keep your site working. Master the tools for fixing things that go wrong. Control operations. Create an administrative interface to oversee your site.
