The MIDI Manual: A Practical Guide to MIDI within Modern Music Production, Fourth Edition, is a complete reference on MIDI. Written by David Miles Huber (a 4x Grammy-nominated musician, producer and author), this best-selling guide provides clear explanations of what MIDI 1.0 and 2.0 are, acting as a guide for electronic instruments, the DAW, MIDI sequencing and how to make best use of them. You will learn how to set up an efficient MIDI system and how to get the most out of your production room and ultimately ... your music. Packed full of useful tips and practical examples on sequencing and mixing techniques, The MIDI Manual also covers in-depth information on system interconnections, controllers, groove tools, the DAW, synchronization and more. For the first time, the MIDI 2.0 spec is explained in light of the latest developments and is accompanied with helpful guidelines for the long-established MIDI 1.0 spec and its implementation chart. Illustrated throughout with helpful photos and screenshots, this is the most readable and clearly explained book on MIDI available.

Metal Music Manual shows you the creative and technical processes involved in producing contemporary heavy music for maximum sonic impact. From pre-production to final mastered product, and fundamental concepts to advanced production techniques, this book contains a world of invaluable practical information. Assisted by clear discussion of critical audio principles and theory, and a comprehensive array of illustrations, photos, and screen grabs, Metal Music Manual is the essential guide to achieving professional production standards. The extensive companion website features multi-track recordings, final mixes, processing examples, audio stems, etc., so you can download the relevant content and experiment with the techniques you read about. The website also features video interviews the author conducted with the following acclaimed producers, who share their expertise, experience, and insight into the processes involved: Fredrik Nordström (Dimmu Borgir, At The Gates, In Flames) Matt Hyde (Slayer, Parkway Drive, Children of Bodom) Ross Robinson (Slinknot, Sepultura, Machine Head) Logan Mader (Gojira, DevilDriver, Fear Factory) Andy Sneap (Megadeth, Killswitch Engage, Testament) Jens Bogren (Opeth, Kreator, Arch Enemy) Daniel Bergstrand (Meshuggah, Soilwork, Behemoth) Nick Raskulinecz (Mastodon, Death Angel, Trivium) Quotes from these interviews are featured throughout Metal Music Manual, with additional contributions from: Ross "Drum Doctor" Garfield (one of the world's top drum sound specialists, with Metallica and Slipknot amongst his credits) Andrew Scheps (Black Sabbath, Linkin Park, Metallica) Maor Appelbaum (Sepultura, Faith No More, Halford)

This must-have guide to special event production resources looks deep behind the scenes of an event and dissects what it is that creates success. It analyses the resources and is an extensive reference guide to the technical details of a big event. It provides a thorough grounding on the specifications and performance of lighting and audio systems, visual presentation technology, special effects and temporary outdoor venues. This new edition includes: New content on: new audio /visual technology, industry safety standards, special effect platforms, décor and new custom forms of staging for both indoor and outdoor events. Updated and new case studies from USA, Canada, India, Russia and Malaysia New Industry Voice feature, including interviews with industry experts from around the world. Comprehensive coverage of venues, staging, seating, rigging, lighting, video, audio, scenic design and décor, CADD, entertainment, special effects, tents, electrical power, fencing and sanitary facilities in a variety of indoor and outdoor event settings. Enhanced online resources including: PowerPoint lecture slides, checklists, glossaries, additional questions and challenges, web links and video links. Incorporating pedagogical features, this easy-to-read book is packed with photographs, diagrams, flow charts, checklists, sample forms and real-life examples. The vast varieties of audio-visual technologies, outdoor venues, décor and staging are presented. A must have resource for event planners, managers, caterers and students. This text is part two of a two book set - also available is Special Events Production: The Process (978-1-138-78565-6). This book analyses the process - the planning and business aspects - to provide a unique guide to producing a variety of events from weddings to festivals.

An updated handbook provides a definitive overview of the latest digital techniques for recording music both on location and in recording studios, covering equipment selection and use, acoustics, microphone techniques, and analog and digital recording, as well as all new coverage of digital recording technology and techniques, a detailed instrument frequency range chart, special sound effects, and more. Original. (Intermediate)

This practical sourcebook has been specially prepared to give you an at-a-glance guide to quality video program-making on a modest budget. Emphasis throughout is on excellence with economy; whether you are working alone or with a small multi-camera group. The well-trieed techniques detailed here will steer you through the hazards of production, helping you to avoid those frustrating, time-wasting problems, and to create an effective video program. For many years Video Production Handbook has helped students and program-makers in a wide range of organizations. Now in its thoroughly revised 3rd edition, Video Production Handbook guides you step-by-step, explaining how to develop your initial program ideas, and build them into a successful working format. It covers the techniques of persuasive camerawork, successful lighting and sound treatment, video editing...etc. You will find straightforward up-to-the-minute guidance with your daily production problems, and a wealth of practical tips based on the author's personal experience. In this extended edition, you will see how you can use quite modest chromakey facilities and visual effects to create the magic of virtual reality surroundings. Gerald Millerson's internationally acclaimed writings are based on a long and distinguished career with the BBC. His lecturing background includes TV production courses in the United States and UK. His other books for Focal Press have become standard works in a number of languages, and include his classic course text Television Production 13th ed, Effective TV Production 3rd ed, Video Camera Techniques 2nd ed, Lighting for TV and Film 3rd ed, Lighting for Video 3rd ed and TV Scenic Design.
