Flew is a  
pioneer for  
modern atheism.  
His famous  
paper, Theology  
and  
Falsification,

was first presented at a meeting of the Oxford Socratic Club chaired by C. S. Lewis and went on to become the most widely reprinted philosophical publication of the last five decades. Flew earned his fame

by arguing that  
one should  
presuppose  
atheism until  
evidence of a  
God surfaces. He  
now believes  
that such  
evidence exists,  
and There Is a  
God chronicles  
his journey from  
staunch atheism  
to believer. For

account of  
Flew's riveting  
decision to  
revoke his  
previous beliefs  
and argue for  
the existence of  
God. Ever since  
Flew's

there has been  
great debate  
among atheists  
and believers  
alike about what  
exactly this  
"conversion"  
means. There Is  
a God will  
finally put this  
debate to rest.  
This is a story  
of a brilliant

where his  
lifelong

eventually led  
him: belief in

One of the most  
extraordinary is

that events at the atomic and subatomic level seem to depend on the future as well as the past. Is time really reversible? Physicist Victor J. Stenger says yes. Contrary to our most basic assumptions

about the  
inevitable flow  
of time from  
past to future,  
the underlying  
reality of all  
phenomena may  
have no  
beginning and no  
end, and not be  
governed by an  
arrow of time.  
Though aware of  
the possibility,

Physicists have  
generally been  
reluctant to  
accept the  
reversibility of  
time as reality  
because of the  
implied causal  
paradoxes: If  
time travel to  
the past were  
possible, then  
you could go  
back and kill

However, Stenger  
shows that this  
paradox does not  
apply for  
quantum  
phenomena. Many  
people believe  
that the laws of  
nature represent  
a deep, Platonic

Stenger  
maintains that  
reality may be  
simpler and less  
mysterious than  
most think. The

quantum world  
only appears

Stenger  
convincingly  
argues that,  
based on

principles of  
simplicity and

reality is
