Decades of research have demonstrated that the parent-child dyad and the environment of the family— which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

From Elizabeth Hay, one of Canada's beloved novelists, comes a startling and beautiful memoir about the drama of her parents' end, and the longer drama of being their daughter. Winner of the 2018 Hilary Weston Writers' Trust Prize for Nonfiction. Jean and Gordon Hay were a colourful, formidable pair. Jean, a late-blooming artist with a marvellous sense of humour, was superlatively frugal; nothing got wasted, not even maggoty soup. Gordon was a proud and ambitious schoolteacher with a terrifying temper, a deep streak of melancholy, and a devotion to flowers, cars, words, and his wife. As old age collides with the tragedy of living too long, these once ferociously independent parents become increasingly dependent on Lizzie, the so-called difficult child. By looking after them in their final decline, she hopes to prove that she can be a good daughter after all. In this courageous memoir, written with tough-minded candour, tenderness, and wit, Elizabeth Hay lays bare the exquisite agony of a family's dynamics—entrenched favouritism, sibling rivalries, grievances that last for decades, genuine admiration, and enduring love. In the end, she reaches a more complete understanding of the most unforgettable characters she will ever know, the vivid giants in her life who were her parents.

In recent years, two significant trends have had a substantial impact on Canadian families. First, Canadian families have been dramatically altered by high rates of separation and divorce, declining fertility, greater popularity of alternative family arrangements such as cohabitation, and increasing involvement of women in paid labour. Second, changes occurring in the economy and the larger society have brought new pressures to bear on families. In Canada's Changing Families, editors Kevin McQuillan and Zenaida R. Ravenera explore how these developments have altered family life. Using data collected in recent surveys by Statistics Canada, contributors to this volume illustrate how transformed conditions in the labour market have forced families to alter their routines and the division of responsibilities within the household. At the same time, the government, striving to maintain or increase the competitive position of the economy, has moved to control spending, restrain taxes, and reduce deficits. The result has been new demands on the family to provide or supplement services that might otherwise be provided by the state. Canada's Changing Families is an eye-opening study and one of great contemporary relevance.

This "powerful" (BuzzFeed) debut about love, grief, and family welcomes you into its pages and invites you to linger, staying with you long after you've closed its covers. "I am madly in love with this book, a kaleidoscopic wonder."—T Kira Madden, author of Long Live the Tribe of Fatherless Girls How do you grieve, if your family doesn't talk about feelings? This is the question the unnamed protagonist of GhostForest considers after her father dies. One of the many Hong Kong "astronaut" fathers, he stays there to work, while the rest of the family immigrated to Canada before the 1997 Handover, when the British returned sovereignty over Hong Kong to China. As she revisits memories of her father through the years, she struggles with unresolved questions and misunderstandings. Turning to her mother and grandmother for answers, she discovers her own life refracted brightly in theirs. Buoyant and heartbreaking, Ghost Forest is a slim novel that envelops the reader in joy and sorrow. Fung writes with a poetic and haunting voice, layering detail and abstraction, weaving memory and oral history to paint a moving portrait of a Chinese-Canadian astronaut family. "Ghost Forest is the tender/funny book we can all appreciate after a hellish year."—Literary Hub

Follows the immigration experience of a young Vietnamese girl who comes of age in a hardscrabble Quebec community before earning an education and pursuing a career and her literary ambitions, in a story constructed as a series of short vignettes.
